PRESS RELEASE

## **Axolot Solutions has signed a trial agreement with a customer in the recycling industry**

**Axolot Solutions in Sweden has signed an agreement with a customer in the recycling industry, for trials with Axolot's patented AxoPur® technology.**

The trials will be carried out at Axolot's premises in Landvetter, with the purpose of separating emulsified oil and metal ions from a flow, thereby in a secure way finding a method for taking care of hazardous waste. The trials will be performed during December.

Martin Ragnar, CEO of Axolot Solutions, says: "Yet another customer, with challenges in the purification of oils and metals in water, is now trying the AxoPur technology in this complex but for our solution very appropriate application. We look forward to showing the possibilities of AxoPur. The recycling industry is only in the beginning of its growth phase, helping other companies and businesses to find solutions for taking care of the society's different residual streams. Recycling is one obvious part of the future and we hope that AxoPur will be another obvious part of it."
