

Helsingborg, April 7, 2021

PRESS RELEASE

## **Axolot Solutions has signed an agreement for in-depth testing of the company's purification technology with a customer in the recycling industry**

**Axolot has signed an agreement for in-depth testing of the company's technology with a customer in the recycling industry.**

The tests will be carried out on-site at the customer's site in May 2021. The work involves a continuation and deepening of the tests that were carried out in the spring of 2020 and aims at producing data for - among other things - dimensioning of a full-scale commercial system. The tests will focus on the removal of hazardous metal ions, prior to an upcoming rebuilding and expansion of the company's recycling operations.

Martin Ragnar, President and CEO of Axolot Solutions, says in a statement: "It is very gratifying with this order for in-depth studies. It shows in black and white that our know-how and patented AxoPur technology are appreciated and considered an attractive option for a customer who wants to contribute to increased recycling in the society".
