

Helsingborg, June 21, 2021

PRESS RELEASE

## **Axolot Solutions has signed a trial agreement with a company within testing activities**

**A trial agreement has been signed with a customer operating within testing activities. The customer needs to purify water coming from firefighting.**

The trials will be carried out at Axolot's premises in Landvetter, with the purpose of purifying water that was contaminated during firefighting. In such operations, many types of contaminants may end up in the water, which puts up specific demands on a broad and efficient purification. The trials will be carried out in June.

Martin Ragnar, President and CEO of Axolot Solutions, says in a statement: "Firefighting is an interesting activity, from a water purification perspective. Not much attention has so far been paid to the contaminants ending up in such waters. This is changing rapidly now and Axolot wants to take a part in it and help other players make a difference."
